FRIDAY, Jan. 10—6 P. M. On 'Change to-day cotton was quiet and steady for spot, but rather firmer for future. Flour requiet, but steady, while wheat and corn were dull and somewhat easier. THE DRY GOODS IMPORTS.

The total imports of foreign dry goods at the port of New York for the week ending January 9, 1873, were \$1,569,765. The amount marketed during the same period was \$1,562,478. THE FOREIGN MARKET.

The London quotations were a fraction lower, say % for United States securities and 1-16 for consols at the beginning of business, but recovered closed strong at the advance of Thursday. Erie shares were weak and underwent a further decline of one per cent. In Paris rates advanced to 53.95, but receded to last night's quotation. viz.:—53.82. The Bank of France shows a decrease for the week of 1,333,000 francs. MONEY EASIER.

The money market opened active, with the bulk of business in call loans at 1-32—a few transactions occurring at as high as 1-16 in addition to 7 per cent. In the afternoon, however, there was a sudden relaxation to 6 a 7 per cent by the time for the closing of the banks. Some loans were reported to have been made at 5 per cent. The relaxation was all the more surprising as the Treasury received over a million of currency in payment for the gold sold yesterday, while a million of gold certificates went

The market for mercantile paper continues to show an easier tendency, and transacnames, but quotations are still wide—viz., 8 a 12 per cent discount for first class paper. The early heaviness of our bonds in London started a rise to 11234, following which there was a relapse to 112% on the recovery of the foreign market, which was reported oyant again with the street rate for money in London down to 2% per cent. But the subsequent large engagements of specie for export to-merrow, coupled with the steadiness of foreign exchange, price the market eventually closed. The extent of the engagements for to-morrow is not less than a

The government list was heavy under a freer supply of bonds, and prices declined, the chief weakness being in the 67's, which fell off 34 per cent to 114%. The lower range of quotations to-day is attributed in the first place to a quite natural reaction from the recent activity and buoyancy which characterized this department of Wall street business, and, in the second, to a pressure of sales on uptown and out-of-town orders following the report of the stringency in the money market on Thursday, a cause that will doubtless cease with this evening's account of the money market. STOCKS DULL AND IRREGULAR. The stock market was dull and irregular, taking it in its general aspect, but was quite active as to a few of the leading favorites, while its irregularity of strength. The whole forenoon seemed, indeed, given over to the unrestrained operations of the "bears," who hammered the market with flattering

success, the weakest feature being Erie, which, under the reputed manipulation of Jay Gould, declined to 60%, in which it was still below the London quetation, as it has been daily for the whole week, the English market seeming, by some strange interchange of ascendancy to, be controlled by the New York price, instead of controlling it, as it has usually heretofore. Quite

by the "bears" in depressing Lake Shore to 91%, ex dividend, against the current sentiment of the street, that, with the dividend off the price would be so low as to tempt active buying of such a stock. A further decline in Ohios attested a further diversion of interest to New York Central, while a break of 2 per cent in Union Pacifics to 3514 was ascribed to the Congressional resolution for a wholesale investigation and overhauling of the affairs of the company. Wabash declined to 72%, but recovered % per cent. Western Union and Rock Island were less active, but firmer, and closed strong. Pacific Mail, after an early display of gymnastics on the inclined plane, took the flying trapeze to 72 on the announcement from Washington that the Committee on Appropriations had

GONE THROUGH THE FORMALITY of including the extra subsidy of \$500,000 granted by Congress last year in the appropriations for the fiscal year beginning July 1, 1873. Meantime New York Central had been quiet at 1011/2 a 102. With the relaxation in money the bullish element rallied around this stock and by a brilliant movement carried it up to 104, the sudden rise giving new vitality to the rumors of an extra dividend, some of the that the veteran Commodore would spring the dividend over night. The evidence of a forthcoming scrip dividend on New York Central Hes very curiously in a remarkable concidence, which has confirmed the faith of the street in its intended declaration. Whenever there has been a

SENSATION IN CENTRAL its development has been preceded by the appearance in Wall street of the muscular Christian and ex Congressman John Morrissey. Now the genial John has been a habitue of the street for the past week or ten days, and "the boys" look upon him as the swallow that predicts the Summer in Central. He made a fortune out of the "big rise" in Central in 1868, "so said." The next time he appeared it was to go "short" of everything just be-fore the Black Friday panic. And now he turns up again when the air is full of another sensation in Central. The directors of the Illinois Central Railroad announce a semi-annual dividend of 5 per cent cash, payable February 1, the transfers closing
